Launch date	April 1 st 2009

Minimum requirements

- A 486-based Intel PC or compatible. A Pentium-based PC is recommended.
- 256 MB RAM.
- 120 MB free disk space.
(105 MB of disk space suffices when you do not install the sample files)
- The Windows Vista, Windows XP or Windows 2000 operating system.

Easy-to-use OCR & Document Archiving Solution

Never retype any text and save a maximum of time using the SmartTasks buttons to scan, recognize, convert and archive all your documents in just a single click.

Extended support of PDF and XPS files

- Turn all your paper documents into searchable PDF or XPS files. Choose the PDF or XPS that suits the best your needs: Image over Text - Text over Image - Text only - Image only.
- Convert any PDF into editable text (for PDF only).

Revolutionary High-Quality Compression technology (iHQC™)*

Create colored PDF and XPS files up to 200 times smaller than the original image size. Ideal for document archiving!

*Level 1 of iHQC™ compression available.

Advanced table recognition

Advanced table recognition and support of the Microsoft format Spreadsheet ML for a perfect table reproduction.

Scan to email

Using Readiris™ is the easiest way to scan paper documents and automatically send them by email.

Multilingual Solution

Readiris™ Pro 12 recognizes more than 120 different languages.
(See the complete list at www.irislink.com).
