Vibe™

Portable SurfaceSound™ Speaker

Innovative Surface Sound Technology from the Silicon Valley

Tunebug's Surface Sound Technology turns almost any surface via soundwaves into a flat panel speaker. Best results are obtained on hollow objects (eg, cartons, boxes) and solid wood surfaces.

The Vibe comes with a protection case which can be also used as a mobile sound box.

Mobile Sound System in stylish Design

Average mobile speaker systems are too bulky. Mobile phones' built-in speakers deliver poor sound quality and insufficient volume.

The "Vibe" is a sleek and powerful sound system that fits in every pocket. MP3 players, mobile phones, laptops and any other audio source are connectable via a 3.5mm audio jack. The rechargeable battery provides at least 5 hours of mobile sound enjoyment.

Specifications

Size And Weight

Dimensions: 2.3 x 1 in (57.15 x 25.4 mm)

Weight: 5.3oz. (150g)

Material: Zinc and Plastic

Connectivity: 3.5mm audio jack

Power And Battery

Battery type: LiPoly (450mAH)

Playtime (5 hours)

Charger included (USB to

3.5 mm)

UPC

851251002011
